

Signing up as a Parent Observer in Canvas

Parents (Observers) can link their Canvas account to their student's account so they can see assignment dues dates, announcements, and other course content. If an institution that is a Canvas client wants parents to observe a student via linked accounts, that institution must create user accounts for parents or guardians, or they will provide self-registration on their Canvas URL login page. Remember, Observers can view the course content but cannot participate in the course.

Notes:

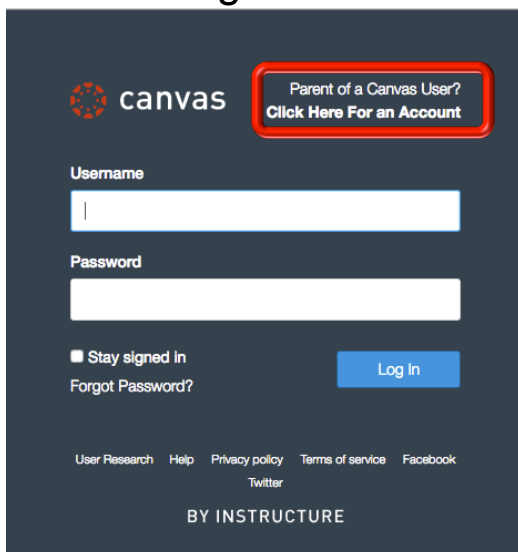

- Observers will create a Canvas account using the institution's Canvas URL. These steps are relevant to any institution that allows the self-registration banner on their Canvas URL login page.
- To observe a student, you must know the student's Canvas username and password.
- The student must be enrolled in the course and must accept the course invitation before you can sign up to observe the student. If you receive an *invalid username or password* message during the signup process and the student's credentials are correct, check with the student to verify that he or she has received and accepted the course invitation.
