

CCS VEX Robotics Summer Camp

Get set Campers for a 4-day, fun-filled week of Robotics and Coding!

Robotics is an engaging way to integrate all facets of STEM education into the classroom and competition is a natural way to capture students' attention. During the excitement that comes with building and competing with robots, VEX campers will be having too much fun to realize they are learning important STEM concepts and life skills!

Campers will first experience the thrill of building their VEX robots and then take on the challenge of competing in a variety of tournament-style games. Campers will also learn to code their robots and operate them in skills-based challenges. If your child is curious about robots or coding – this is the place to be! No prior robotics or coding experience necessary.

- VEX **IQ** is the perfect camp for rising 4th to 8th grade boys and girls.
- VEX **VRC** is perfect for campers who want to take previous robotics experience to the next level.

Camp Hours: 8:00 – 3:00 Monday- Thursday

All camps cost \$250 and include a daily CCS lunch.

Note: CCS VEX reserves the right to cancel with full refund based on camp enrollment numbers.
