

# Install the FortiClient VPN

Go to <https://www.forticlient.com/downloads>

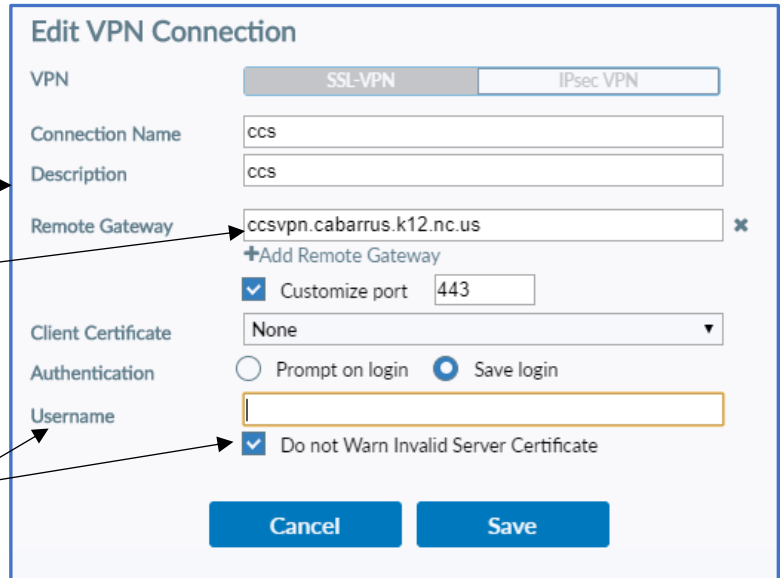

Download and install the **Forticlient VPN** for Windows or Mac.

Start the VPN, then click **Configure VPN**

The settings should be:

- Select the SSL-VPN tab at the top.
- Connection Name: **CCS**
- Description: **CCS**
- Remote Gateway: **ccsvpn.cabarrus.k12.nc.us**
- Authentication: **"Save Login"**
- Checkbox: **"Do not warn invalid server certificate"**
- Username: **ccs login username**
- Click Save/Apply and Close

## To Connect to the VPN

- Start the **VPN Client** from **MAC-go** to **Launch Pad** and click the **VPN client App**.
- From a **Dell (PC)** use the **search tray** and type **VPN** and the client should appear.
- Login with **CCS credentials**.
