

Advanced Placement & Optimal Academic Rigor in High School

The following AP Courses are available as course selections for 2021-2022 at **West Cabarrus High School**. Students should carefully consider their overall commitments (school, work, athletics, clubs, activities, family time, friends, recreation, etc.) while choosing the most rigorous courses for their ability as part of their holistic planning for college and career readiness. Another option for additional rigor may be to add Career & College Promise (CCP) classes as well.

Rigor is important. A small amount of stress may be motivation. Too much of a challenge or stress can be overwhelming. Choose wisely, with the advisement of your parents, teachers and counselors, while carefully considering the context and scope of your commitments for next year.
