Early Kingdoms of Medieval Europe

During the Middle Ages or medieval era, many Europeans were poor, uneducated, and violent.

- Early in the Middle Ages, barbarian tribes settled in Western Europe and established their own kingdoms.
- Barbarian kings, wanting to be as civilized as the Romans, became Roman Catholic.
- One Frankish king, Charlemagne, conquered much of Western Europe and launched education reforms.

Charlemagne, a Frank, conquered the Bavarians, Lombards, and Avars. He hoped to restore the Roman Empire in the West. Here his army battles the Saxons.

Map: Early Kingdoms of Medieval Europe

Key:
- Barbarian kingdoms
- Byzantine Empire
- Lombard invasion and migration
- Slav and Roman Catholic

Call-outs are mini-captions right on the map.

Locator maps explain what part of the world is shown.
The unit timeline shows key events from this time period. Use it to preview the unit.

At the end of the unit, use the timeline to review the sequence of key events.

Charlemagne's Frankish Empire

Expansion Under Charlemagne

- Frankish Empire, 771
- Additions to the Frankish Empire by 814
- Defeated but not taken over
- Bottle
- Capital

C

Charlemagne's empire extended beyond what is now France into lands that are now Germany, Italy, Switzerland, Belgium, and the Netherlands. His empire spread Christianity into new areas.

771 Charlemagne becomes sole ruler of the Frankish Empire

800 Charlemagne is Emperor of the West

863 The empire breaks up 39 years after death of Charlemagne

1215 Magna Carta gives rights to free men in England

1337-1453 Hundred Years' War fought between England and France

1453 Ottomans conquer Constantinople

1347 Plague-infected rats arrive in Sicily

1434 Otto I creates what will be the Holy Roman Empire

This symbol lets you know that the website WorldHistoryAtlas.com has more maps, graphs, photos, and/or primary sources on the topic.

What else can you find in this atlas?

Milestones of World History on the inside front cover are a short list of key events.

Reference Maps on pages 126-129 show the world today.

Timetables of World History on 130-133 show what was happening in different places at the same time.

Glossary on 134-136 defines special words and names used in the atlas.

Index on 137-144 lists all the pages where people, places, or events are mentioned.

Thematic Index on the inside back cover lists all the pages related to certain big topics.

Abbreviations are explained on the inside front cover too.
People Migrate Across the Earth

About 100,000 B.C. early people began migrating from their African homeland.

- For thousands of years, people moved into new areas in search of food. They hunted animals and gathered wild plants.
- Ice ages killed much of their food, forcing people to move. They migrated on foot or in small boats.
- By 9000 B.C. people had migrated to most regions of the world.

A People first migrated to regions that had plenty of food and comfortable climates. Which continents had been reached by 25,000 B.C.?

ENVIRONMENT

Sea Level at the Bering Strait

Glaciers grow in cold regions. Sea level drops.
Glaciers melt. Sea level rises.
Dry land links Asia and America

What was the ice age?

Large parts of the earth were once covered by thick layers of ice called ice sheets. They formed during the cold periods known as ice ages, which lasted thousands of years.

B The earth's temperature began to fall around 100,000 B.C. Rivers froze, so water could not flow back to the sea. The sea level dropped. Areas that had been underwater were exposed as dry land.
5000 B.C. Irrigation is used in farming.
3500 B.C. First civilization rises in Sumer. Bronze tools are made.
2350 B.C. First empire rises in Akkad.
By 1200 B.C. Hebrews live in Canaan.
539 B.C. Cyrus of Persia conquers Babylon.
4000 B.C. Sahara gets drier, soon becomes desert.
1800–1600 B.C. Assyria and Babylonia create empires in Mesopotamia.
900 B.C. Phoenicians sail to the Atlantic Ocean.

Early Human Migrations
100,000–9000 B.C.

Spread of Humans
- 100,000–75,000 B.C.
- 75,000–50,000 B.C.
- 50,000–25,000 B.C.
- 25,000–9000 B.C.

Ice Age
- sea ice, 16,000 B.C.
- glacier or ice sheet
- ice age coastline
- coastline today

Equatorial Scale
- 0 1000 2000 kilometers

100,000 B.C. People begin to migrate out of East Africa.
55,000 B.C. People cross open ocean to reach Australia.

C One early form of expression was cave painting. Many cave paintings show animals that people hunted.
D About 2000 B.C. people with advanced skills and improved boats began sailing to distant islands in the Pacific Ocean.
Agriculture and Early Settlements

Agriculture, or growing plants and raising animals for food, changed human society forever. Agriculture was more reliable than hunting and gathering.

- People began to herd or keep wild animals in pens. They became farmers, planting seeds from wild grasses using hoes and digging sticks.
- Settlements became permanent. Farming communities grew into villages. A surplus of food allowed people to specialize and work other jobs.
- Specialists improved metalworking, making stronger tools and weapons. These advances in technology are used to name the Bronze and Iron Ages.

**SCIENCE & TECHNOLOGY**
**Earliest Domestic Plants and Animals**

Metal replaced stone for making tools and weapons at different times around the world. Bronze, a mixture of copper and tin, replaced copper and stone when more tin was found. Iron, a cheaper and stronger metal, replaced bronze when improved heating methods were developed.
Civilization in Ancient Mesopotamia

The earliest known civilization, Sumer, and the world’s first empire, the Akkadian Empire, both developed in Mesopotamia.

■ The Sumerians developed the first written language and the first laws. They also traded with places as far away as Egypt and India.
■ Each Sumerian city-state was independent. Each had its own ruler, own special god, and own army.
■ People from the neighboring region of Akkad later conquered Sumer and the rest of the area around the Tigris and Euphrates Rivers. Once conquered, city-states were simply cities.

During the Bronze Age, Sumerians fought using bronze weapons and chariots pulled by donkeys. This image is of Sumerians crushing an enemy.

People in Mesopotamia first used objects, or tokens, to record trades. Sumerians then scratched the same shapes on clay tablets. Later they used triangular reeds to scratch these shapes. These wedge shapes, or cuneiform, became the basis of written language in Mesopotamia.

Is it a city or is it a state?
Early civilizations weren’t part of a large country. Instead, people were governed by their own city-state. A city-state included a city and the surrounding countryside. There are a few city-states today, such as Monaco in Europe and Singapore in Asia.

Mesopotamia, the area between the Tigris and Euphrates Rivers, means “between the rivers.” Mesopotamia was part of an area of good farmland, called the Fertile Crescent.
Sumerians all spoke the same language and had the same customs, but their Semitic and Elamite neighbors spoke different languages and had different customs. Even so, trade was common.

The Akkadian Empire spanned most of the Fertile Crescent. Compare maps D and E. Empires rule many different people. What groups were ruled by the Akkadian Empire?
Babylonia and Assyria

After the Akkadian Empire fell, two groups struggled for control of the Fertile Crescent. Babylonians from Babylon and Assyrians from Ashur became the major powers in the region.

- Babylon was long known as a center of learning. Babylonian science and literature were admired and imitated throughout the Fertile Crescent.
- In contrast, Assyria was known for its fierce army.
- Babylonia and Assyria fought each other often over the course of a thousand years. Each conquered the other more than once.

The Babylonians and Assyrians built monuments to show their wealth and power. Above is a replica of Babylon's Ishtar Gate. The wealth came from conquests and taxes.

Why do empires fail?

Akkad, Babylon, and Ashur all produced empires, ruling distant lands with languages and customs unlike their own. Such differences make empires hard to govern.

The Babylonian Empire expanded under Hammurabi, one of Babylonia's most important kings. He is also remembered for his extensive law code.
New Assyrian Empire
934–612 B.C.

Assyria, 911 B.C.
Assyrian gains by 824 B.C.
Assyrian gains by 664 B.C.
Babylonian conquest
Assyrian conquest
Babylonian conquest
Capital

Centuries later, Assyrian armies again terrified the entire Fertile Crescent. They conquered the Babylonians, Phoenicians, Hebrews, Egyptians, and others.

612 B.C. Babylonians win control of most of Assyrian Empire.
539 B.C. Persia conquers Babylonian Empire.
587–586 B.C. Jerusalem falls to Persia.
601 B.C. Babylonian Empire fails to conquer Egypt.

612 B.C. Babylonians and Medes conquer Assyria.
934 B.C. Assyrian Empire regains power and begins expanding.

Chaldaeans from Babylonia conquered Assyria. The New Babylonian Empire was the last of the Mesopotamian empires. Compare its size with that of Babylonia's original empire, shown on map A.

Science & Technology

Babylonian Contributions

Time
- Divided a year into 12 months.
- Divided a day into 24 hours.
- Divided an hour into 60 minutes.

Mathematics
- Split circle into 360 degrees.

Astronomy
- Accurately predicted dates of eclipses.

Babylonians liked numbers that could be evenly divided by many other numbers. Notice how such numbers are used in Babylonian contributions to time and mathematics.
Hebrew Kingdoms

According to the Hebrew Bible (Tanakh), Hebrews came from southeastern Mesopotamia near the Persian Gulf. Around 1800 B.C., they migrated west to the Mediterranean coast.

- They are said to have settled in Canaan, which they believed their god had given them.
- A Hebrew kingdom was formed by 1200 B.C. Later it split into Israel and Judah.
- Wars and famine often forced Hebrews to leave their "Promised Land."
- The Hebrews came to be called Jews and their religion Judaism.

In the biblical accounts, leaders such as Abraham and Moses led the Hebrews to Canaan. Archaeologists have not been able to confirm these accounts.

God or gods?
Unlike their neighbors in the Fertile Crescent, many Hebrews worshipped only one god. By 539 B.C., Hebrews were not allowed to worship any other gods. Christianity and Islam, which developed from Judaism, also worship just one god.

Attacks on Hebrew Kingdoms

900–516 B.C.

</tr>
</tbody>
</table>

After the fall of Jerusalem in 586 B.C., leaders and skilled craftsmen of Judah were sent to Babylon. There they wrote down their traditions, laws, and beliefs in part of what is now known as the Hebrew Bible or Old Testament.
Phoenician Trade

The Phoenician civilization, like that of the Hebrews, developed along the eastern edge of the Mediterranean Sea.

- By 2900 B.C. the Phoenicians had become the first major sea-going civilization. Their ships could travel long distances using either sails or oars.

- The Phoenicians established a large trade network. They also established colonies in North Africa, southern Spain, and on islands in the Mediterranean Sea.

- To make trade easier, the Phoenicians developed a simple writing system that used symbols for sounds instead of symbols for words or ideas.

Sumerians used over 500 symbols in their writing; Phoenicians used only 22. Other cultures adopted the Phoenician symbols, on which our modern alphabet is based.

Main Sources of Trade

- Silver
- Oil
- Copper
- Glass
- Gold
- Dye
- Salt
- Grain
- Ivory
- Cedar
- Cloth

Map shows boundaries of 800 B.C.

D Phoenicians controlled trade throughout the Mediterranean Sea and into the Atlantic Ocean—connecting cultures throughout the region.
Civilization in Ancient Egypt

Ancient Egypt is one of the oldest and longest lasting civilizations in the world. This civilization began in a river valley more than 5,000 years ago.

- Ancient Egypt arose along the Nile River in northeastern Africa.
- The first 2,000 years of Egyptian history are divided into three periods: the Old, Middle, and New Kingdoms.
- The ancient Egyptians developed an advanced civilization. They built cities, invented hieroglyphics (a form of writing), and created large monuments.

During the Old Kingdom, a strong central government was established and the building of pyramids began. During the Middle Kingdom, Egypt expanded south along the Nile and conquered Lower Nubia.

Thousands of workers built huge pyramids as tombs for Egyptian rulers. Farmers helped when the Nile flooded.
After the Middle Kingdom broke apart, Egypt was ruled by the Hyksos people of Asia. Then the Egyptians overthrew the Hyksos and began the New Kingdom. This new Egyptian empire became the strongest and wealthiest in the world.

**Environment**

**Flooding of the Nile**

The Nile flooded around the same time every year, depositing rich soil for farming. The data for this graph is from a more recent time. Exact water levels may have been different in ancient Egypt.

Most Egyptians lived in the Nile River Valley. This husband and wife are plowing fields, preparing the soil for planting. Look at graph D. In which months would they be plowing?
Ancient Egypt and Kush

At the end of the New Kingdom, nobles and priests began to compete for power. The Egyptian empire weakened and began to lose territory.

- Egypt was invaded by neighboring Libyans. The Libyans were among the first foreigners to rule Egypt.
- As Egypt fell under foreign rule, the kingdom of Kush formed its own civilization based on Egyptian and local cultures.
- Kush ruled Egypt for almost 100 years. Later it defended itself from the foreign rulers of Egypt.
- Kush and later kingdoms remained centers of trade between southern Africa and the Mediterranean region.

Kush Invaded Egypt
750–664 B.C.

Kush invaded Egypt from the south and gradually conquered Egyptian territory to the Mediterranean Sea. Kushites ruled Egypt until they were defeated by Assyrians.

Compare the amount of time that Egyptians ruled Egypt with the amount of time that foreign powers ruled. Which foreign power ruled Egypt the longest?

Kush and Egypt traded with each other for centuries. This painting from an Egyptian tomb shows copper, ivory, animal skins, and other goods from Kush.

Kush sold goods from west and central Africa and ports along the Red Sea.

Kush took Egyptian culture and adapted it. For example, this Kush crown has cobras, similar to those on an Egyptian pharaoh’s crown. Where are the cobras?

After withdrawing from Egypt, Kush moved its capital farther south to Meroe. They controlled trade along the Nile and became the main source of iron for much of eastern Africa.
Civilization in Ancient China

China has one of the oldest continuous civilizations in the world. Chinese civilization developed from two early cultures living in two river valleys.

- The earliest Chinese culture was the Yangshao. It developed 7,000 years ago in the Huang He Valley, in what is now northern China.
- The Longshan culture developed about 2,000 years later and eventually replaced the Yangshao.
- China’s first dynasty or family of rulers emerged from the Longshan culture. It is known as the Shang dynasty.
- The Shang dynasty ruled a portion of what is now China for more than 600 years.

A Rice was first grown in the Yangtze Valley around 5000 B.C. It became the main crop of southern China.

B The development and spread of early farming cultures advanced Chinese civilization. Compare what was grown in northern China with what was grown farther south.

Early Chinese Civilizations

</table>

Writing developed during the Shang dynasty. Chinese characters represented ideas, not sounds. Everyone used the same characters so people could communicate through writing even if they spoke different languages.

The Shang dynasty was the beginning of China’s Bronze Age. (See the timeline on page 9.) Bronze was used for decorative objects, such as this water buffalo, as well as for tools and weapons.

Can we keep it in the family?
When the rule of a kingdom or an empire is passed down from one family member to another, usually from a father to a son, it is sometimes called a dynasty. Ancient China was ruled by a series of dynasties, as was ancient Egypt.
Dynasties of Ancient China

After the Shang dynasty was overthrown, three other dynasties helped expand, unify, and develop ancient China.

- The Zhou dynasty ruled for 900 years. However, the Zhou had difficulty controlling their territory.
- The Qin established China's first unified empire. The name China comes from Qin, which is also spelled Chin.
- The Qin were overthrown, and the Han dynasty rose to power. The first Han emperor reduced taxes and changed harsh laws.

What did Confucius say?
The Chinese philosopher Confucius (born around 551 B.C.) developed a guide to living a moral life. His teachings apply to everyday life, as well as to political rule. They became the ruling philosophy of China.

The Qin dynasty began the Great Wall of China to keep out barbarian invaders. Later dynasties added to the wall. This section was built during the Ming dynasty (see page 53). The Great Wall is more than 4,000 miles long.
The Qin defeated other states and started China's first strong central government. But high taxes and harsh laws led to a revolt. After only 15 years, the dynasty was overthrown.

Han Dynasty
206 B.C.-A.D. 220

206 B.C.-A.D. 25 Han dynasty takes control and expands the Chinese empire.
A.D. 220 Han emperor gives up throne.

The Han dynasty controlled a larger Chinese empire and opened China to trade with foreigners. Compare the sizes of the Qin and Han territories.

2 Han dynasty builds Silk Road, linking China with Europe.
A.D. 25-220 Han dynasty builds economy, then falters.
Ancient India and the Spread of Hinduism

One of the first civilizations and one of the world's oldest religions developed in ancient India.

- People began to settle in the Indus River Valley in south Asia about 6,000 years ago. Farming and herding communities developed.
- An advanced civilization with carefully planned cities developed in the valley. The Indus Valley Civilization thrived for 900 years.
- A large group of nomads, the Aryans, migrated to India. Their religious beliefs helped form a new religion called Hinduism.

How Big Is the Indian Subcontinent?

India is part of a subcontinent that includes the modern countries of India, Pakistan, Bangladesh, Nepal, Sri Lanka, and Bhutan. (See their boundaries on page 127.) Compare it to the size of the United States.

What do Hindus believe?

Hindus believe that all living things have many lives. If you do good things in this life, you will come back as someone wiser and better in your next life. If you do bad things in this life, you could come back as a rat or even a gnat!

![Map of India and the Indus Valley Civilization](image)

Indus Valley Civilization (6000-1700 B.C.)

- 6000 B.C.: Farming begins in western India.
- 2500 B.C.: Mohenjo-Daro and Harappa are world's first planned cities.
- 1700 B.C.: After surviving 900 years of floods, Indus cities are abandoned.

Each year the rivers of the Indus Valley flooded, bringing rich soil and water for crops. Cities traded with communities across the Arabian Sea and as far as Mesopotamia.
Mohenjo-Daro had straight streets and large public buildings and meeting places. Its two-story houses were built of baked bricks, and many included rooms for bathing.

Hinduism developed and spread throughout India after the Aryans migrated there. Hinduism remains one of the world's major religions.

Aryans and Hinduism

- **1650–500 B.C.** Warlike Aryans migrate from Central Asia.
- **1500–1000 B.C.** Aryans expand across Ganges Plain.
- **1500–500 B.C.** Hinduism spreads throughout India.
- By 1500 B.C., many Dravidians migrate south as Aryans arrive.
- **500 B.C.** Hindu kingdoms exist throughout India.
Ancient India and the Spread of Buddhism

In addition to Hinduism, another major world religion developed in ancient India—Buddhism.

- Buddhism was based on the teachings of Siddhartha Gautama. He preached a new way of life to end suffering.
- The Mauryas united India and created the first Indian empire. During their reign, Buddhism spread throughout India.
- Later the Gupta Empire emerged. They started a golden age in India when culture and science thrived.

What's nirvana?
Imagine having great wisdom and compassion and being free from suffering. This state of peacefulness is called nirvana. Reaching nirvana is the goal of Buddhism.

The name Buddha means "the Enlightened One." Siddhartha Gautama was called Buddha because of his wise teachings on how to live a good life.

Which of these cities can you find on map C? Which were centers of Buddhism?
Civilization in Ancient Mexico

The Olmec and the Maya were the earliest major Native American civilizations. Both developed in Middle America.

- The Olmec civilization developed along the coast of the Gulf of Mexico.
- The Olmec built large sculptures and were the first people in the Americas to build pyramids. Their art and religion influenced later cultures of Middle America, including the Maya.
- The Maya civilization developed east of the Olmec. It was one of the longest lasting civilizations in the Americas.
- The Maya used pictographs to record major events in their history on large stone sculptures. Many of these sculptures still stand today.

A Giant carvings like this one were used in ceremonies at Olmec religious centers. The largest heads were up to 10 feet tall and weighed several tons.

Why the difference?
Asians, Africans, and Europeans learned from one another. Without this contact, Native American civilizations never developed bronze or iron. They also never domesticated animals larger than dogs, except in Peru.

Olmec Civilization
1200 - 400 B.C.

Middle American Civilizations, 1000 B.C.

B The Olmec civilization was the first culture in the Americas to build cities with large religious centers. It traded with other cultures and its art has been found throughout Middle America.
The Maya had many accomplishments in art, agriculture, astronomy, and mathematics. Compare this chart with the one for Babylon on page 13.

Large limestone pyramids with temples at the top were built by the Maya for religious ceremonies. This pyramid is located in the Maya city of Tikal. Find Tikal on map E.

During this time, Maya civilization flourished. Cities became centers of culture, and a vast trade network developed. Compare Maya territory on this map to Maya territory on map B.
Civilizations of Ancient Greece

The Minoans and the Mycenaens developed civilizations in the region of present-day Greece. Their achievements became the foundation of Greek culture.

- The Minoans were known as great artisans. Legends of their cleverness became part of Greek myths.
- The Mycenaens were fierce warriors. Through conquest, they spread their culture around the Aegean Sea.
- Both civilizations produced expert sailors. Around 1200 B.C., they were destroyed by invasion.
- Greek city-states recovered before 750 B.C. As the city-states grew, they established new colonies along the sea coasts.

The Mycenaens took control of the region and conquered Minoan Crete. Afterwards they were shaped by the Minoan culture.
What is a colony?
Greek "mother-cities" founded new cities, or colonies, throughout the Mediterranean region. Most colonies were independent city-states, while others were only trading posts.

The Mycenaean were known for their elaborate bronze and gold work. Great wealth and labor was spent on royal graves filled with treasures such as this gold mask.

Greece and Its Colonies

The Greeks and the Phoenicians were trading partners and rivals. Compare this map with the map on page 15. Which areas did both Greeks and Phoenicians settle?
Growth of Greek City-States

Ancient Greece was a culture region, not a country. It was made up of independent city-states.

- Although Greek city-states shared the same language and religion, they had different forms of government.
- The Persian Empire threatened to conquer Greece. The most powerful Greek city-states united to overcome Persian forces.
- The city-state of Athens was the birthplace of democracy and a leading cultural center of the Greek world. Its ideas influenced later civilizations.
- Wars between the two most powerful city-states, Athens and Sparta nearly destroyed Greece.

Social Structure
Athens 510 - 338 B.C.

Citizens
- Have two Athenian parents.
- Can own land, if men.
- Serve in the Assembly, hold offices, and vote, if men.
- Work as land-owning aristocrats, farmers, craftsmen, merchants, and rowers.

Metics
- Have at least one non-Athenian or foreign parent.
- Cannot own land or vote.
- Work as business owners and merchants.

Slaves
- Are prisoners of war or foreign captives.
- Cannot own land or vote.
- Work as house servants, miners, and policemen.

In Athens, a man’s place in society was based on his parents. All women in Athens were considered the property of their fathers, husbands, or owners. Athenian women were rarely seen outside the home.

After Athens and Eretria helped the Ionian revolts, Persia invaded European Greece twice. Athens and Sparta organized the city-states to resist the invasions. Incredibly the Greeks defeated the Persian Empire.

0 100 200 miles
0 100 200 kilometers

G Sparta was the most powerful city-state on the peninsula of Peloponnesus. Athens controlled most of the city-states along the Aegean Sea. Prolonged warfare between Athens and Sparta permanently weakened the region.

GOVERNMENT
Democracy in Athens

Assembly
Members: All citizens over age 20
Role: Made decisions and passed laws by majority vote.

Council of 500
Members: 500 randomly chosen citizens over age 30
Role: Proposed laws and carried out decisions made by the Assembly.

Court
Members: 6,000 randomly chosen citizens assigned to specific panels
Role: Decided on cases by majority vote. A tie vote acquitted. Verdicts could not be appealed.

Generals
Members: Ten elected citizens (the only elected office)
Role: Commanded armies and navies. Decisions made by a majority.

Socrates of Athens encouraged his students to question everything to find truth and live by that truth. This Socratic method would become the basis of all later Greek philosophy.

The Athenian government was a direct democracy. Any male citizen could personally serve in the government, rather than through representatives.
The Conquests of Alexander the Great

Alexander the Great, king of ancient Macedonia, built an empire that stretched from Greece to India.

- Years of fighting had weakened the Greek city-states. Macedonia, a kingdom in northern Greece, conquered the entire region.
- Then Alexander turned to the east and conquered the Persian Empire.
- When Alexander died, his generals divided his empire into separate kingdoms.
- Alexander's conquests led to the mixing of Greek culture with the cultures of conquered lands.

Alexander's conquests spread Greek society across western Asia. This Greek-style relief of him was found in Sidon, a major Phoenician city in Lebanon.

How Big Was Alexander's Empire?

Alexander's vast empire included land on Europe, Africa, and Asia. Compare it to the size of the United States.

How do you show your culture?

Culture is what makes a group of people unique, or different from other groups. The religion we follow, the language we speak, even what we eat or drink, can all be part of our culture.
Before Alexander's invasion, the Persian Empire was the largest empire in the region. Compare this map with map D. How much of Alexander's empire had been ruled by the Persians?

To conquer his empire, Alexander led his armies through scorching deserts and across steep mountains. In some areas, Alexander moved his troops along roads the Persians had built.
From Roman Republic to Roman Empire

Rome was founded as a small city-state, then became a republic, and eventually grew into a powerful empire.

- Rome became a republic in 509 B.C. The republic came to have a democratic government.
- The Roman Republic gained land through conquest. As the republic grew, so did its army.
- Civil wars destroyed the Roman Republic. The republic became an empire by 27 B.C., led by a single ruler.
- The capital of the republic and the empire was the city of Rome.

Julius Caesar, in red, was a popular general and politician. His conquest of Gaul allowed him to overthrow the Senate and become dictator.

The republic first expanded beyond Italy during wars with its neighboring rival, Carthage. After Carthage was defeated, the Romans conquered former allies of Carthage.

  - Killed or wounded: 40,000

- **Second Punic War**
  - Killed or wounded: 30,000

Ancient armies fought using hand-to-hand combat. The Greeks and Macedonians used spears and the Romans used swords. An army would charge at the enemy trying to break its formations.
Height of the Roman Empire

After the change from republic to empire, Roman territory continued to expand. At its height, the Roman Empire ruled the entire Mediterranean region.

- Strong Roman rulers brought peace and wealth to the region during a period called "Pax Romana."
- Roman roads and sea routes connected the empire. Long distance trade thrived.
- The Roman Empire included many different cultures. Trade and a common language helped unite the empire.

Roman coins were used throughout the empire, making trade easier. Coins also announced an emperor's achievements, similar to newspaper headlines.

The Roman Empire was rich with important resources, such as grain and metal. As the empire grew, the variety of trade goods increased.

Expansion and Trade in the Roman Empire
44 B.C.–A.D. 180

Latin is no longer spoken, but modern Romance languages are based on Latin. English is not a Romance language. Many of its words have Latin roots, but many others do not.
Judaism and Christianity expanded throughout the Roman Empire.

- The king of Judea voluntarily joined the Roman Empire in 63 B.C. However, many Jews objected to foreign rule.
- Many Jews left Judea for greater economic opportunities.
- Christianity began as a branch of Judaism. After Jesus died, his followers spread through the empire. As non-Jews joined, Christianity became its own religion.
- Both Jews and Christians were persecuted by the Romans. After two major revolts, the surviving Jews were expelled from their homeland.

**Jews and Christians Under Roman Rule**

- **63 B.C.** Judea joins the Roman Empire.
- **About 30** Jesus is executed.
- **132-135** After a new revolt, Jews are barred from Judea. Christianity is made official religion of empire.
- **392** Christianity is made official religion of empire.
- **About 4 B.C.** Jesus is born.
- **45-62** Paul spreads Christianity.
- **66-73** Jews revolt. Jerusalem is destroyed.
- **303-312** Persecution of Christians intensifies.

A Roman leaders persecuted both Jews and Christians, but Jewish and Christian communities continued to spread. Eventually Christianity became the official religion in the Roman Empire.

**Jewish Migration During the Roman Empire**

- **63 B.C.-A.D. 300**
- **63 B.C.** Judea becomes part of the Roman Empire.
- **A.D. 70** Judean War ends. Many Jews flee harsh Roman rule.
- Jews migrate along trade routes.

**After the first Jewish revolt in A.D. 66 and the destruction of Jerusalem in A.D. 70, many Jews fled Judea. This movement is known as the Jewish Diaspora.**
Spread of Christianity During the Roman Empire

- Roman Empire in A.D. 180
Gaul Culture region

Christianity first spread in the eastern Mediterranean region, helped by the travels of the early Christian leader Paul. Later Christian communities were established along important trade routes in other parts of the Roman Empire.

What Is Christianity?
Christianity is based on the teachings of Jesus Christ, whom Christians believe is the son of God. Today Christianity, which began as a branch of Judaism, has more followers than any other religion in the world.

Paul was a Jew from Tarsus who converted to Christianity. He traveled through the empire as far as Rome, preaching Christian ideas to non-Jews and establishing Christian communities. Here he is shown in Athens.
Decline of the Roman Empire

Corrupt rulers and constant wars weakened the Roman Empire. By the end of the 400s, only the eastern half of the empire had survived.

- Civil wars, disease, and famine created disorder throughout the empire.
- At the same time, migrating barbarians from Europe and Asia invaded the empire. They claimed land for their own kingdoms.
- In 395 Roman territory was divided into the Western Empire and the Eastern Empire.
- By 475 the western lands were no longer under Roman control. The Eastern Empire continued to thrive.

What is a barbarian?
The word barbarian comes from a Greek insult to non-Greek speakers. To the Greeks, other languages were just “bar-bar,” or nonsense. The Romans used the word to describe people who were uncivilized, which is how we use it today.

B Because the empire was too large to govern effectively, it was divided into western and eastern regions. Each region was led by its own emperor. The empire was never reunited.
By 476 invaders had conquered most of the Western Roman Empire. The Eastern Roman Empire was stronger and better organized. It continued to resist invaders long after the Western Empire collapsed.

The Huns terrified both Romans and other barbarians. Tribes fled from the Huns by invading the empire. A Roman-barbarian alliance stopped the Huns, but the Western Empire was effectively destroyed.

By 500 Constantinople had become one of the world’s great cities.
Ideas Travel the Silk Road

Between A.D. 400 and 1500, cultures of Asia, Africa, and Europe came into closer contact with one another.

- The Silk Road and other trade routes helped link distant areas. Trade and travel increased.
- Traders and armies brought ideas and inventions from one region to another.
- Religions such as Christianity, Islam, and Buddhism linked large regions.

From the 700s to the 1400s, the **Arab world** was the center of scientific discovery. Many advances were made in science and medicine, as shown by this text on the human eye.

The digits 0–9 that are used by people all over the world today are called Hindu-Arabic numerals. This system was developed in **India** over hundreds of years and then spread westward.
Stirrups, thought to have been developed in Central Asia, changed how horses were used in war. A rider seated in a saddle with stirrups was better able to use a weapon.

Chinese sailors were the first to use magnetic compasses. Unlike navigating by the stars, a compass could be used any time of day in any weather conditions and allowed for more accurate navigation.

Printing, invented in China, allowed many copies to be produced quickly, making information more widely available. Printing used paper, also invented in China, which was much cheaper than other writing materials.
The Spread of Islam

Islam emerged in Arabia in the 600s and grew into a major world religion.

- Muhammad was the founder of Islam. He was both a political and a religious leader.
- The early leaders of Islam built large empires. Many of the people they conquered became followers of Islam, or Muslims.
- Later, through trade, Islam spread into regions that were not ruled by Muslims.

What's Islam?

Islam is a religion based on the teachings of Muhammad, whom Muslims believe was the messenger of God (called Allah in Arabic). Today Islam is one of the world's most widespread religions.

A The Qur'an (also spelled Koran) is the holy book of Islam. It includes basic religious duties of all Muslims.

Spread of Islamic Empires 622-850

Under Islamic Rule

- By 632 (Muhammad)
- By 661 (next four rulers)
- By 850 (Umayyad and Abbasid Empires)

- Muslim armies
- Islamic capital
- Battle

1 622 Muhammad's journey to Medina begins the spread of Islam.
2 732 Franks stop Muslim advance. (See page 66.)
3 661 Capital moves from Medina to Damascus, later to Baghdad.
4 751 Muslims prevent Chinese conquest of Islamic lands.
5 751 Tali's River

B Islam first expanded through military conquest. The rulers of the Islamic empires were also religious leaders.
After 850 Islam also spreads by trade and conversion.

By 1500 Many Muslims live outside Muslim-ruled lands.

For more about Islam in Africa, see pages 58–59.

**Later Spread of Islam 850–1500**

<table>

After 850 the Islamic empire had begun to lose power, but Islam continued to spread. Muslim traders introduced Islamic culture to China, Southeast Asia, and Africa.

Mecca, the birthplace of Muhammad, is the holiest city in Islam. Traveling to Mecca to pray, called the hajj, is one of the five major religious duties of Muslims.
Growth and Decline of the Byzantine Empire

The Eastern Roman Empire became known as the Byzantine Empire. It outlasted the Western Empire by nearly 1000 years.

- The Byzantine Empire had many enemies. Islamic empires, led by Arabs and Turks, conquered much of the empire.
- Constantinople, the capital, was a major trade center. Wealth from trade was spent to keep the army strong.
- After 400 years of fighting, Turkish invaders conquered the empire.

A This mosaic, an image made from small bits of tile, shows Mary and the baby Jesus. Emperor Constantine stands to the right, offering them Constantinople.

B At its greatest extent, the Byzantine Empire ruled much of the territory of the former Roman Empire. Deadly disease and military challenges made it difficult to hold on to these lands.
Tang and Sung Dynasties of China

During the Tang and Sung dynasties, trade as well as conflict between China and neighboring cultures increased.

- Under the control of the Tang dynasty, trade along the Silk Road flourished.
- Like the Byzantine emperors, Tang and Sung rulers defended their realm against many invasions by neighbors.
- By the end of the Sung dynasty, however, the Mongols had conquered all of China.

Many Tang dynasty sculptures, such as this one, show horses. The Tang traded with Central Asia for strong, fast horses, which gave them an advantage in war.

Although China's boundaries shrank during the Tang and Sung dynasties, farming advances helped its population grow.
The Mongol Empire Spans Eurasia

Mongol tribes swept across Asia and Europe, creating one of the largest empires in world history.

- The Mongols were nomads who originally lived in the dry grasslands of Central Asia. They were excellent horsemen and ruthless warriors.
- The Mongols conquered Islamic and Chinese empires and destroyed major cities along the Silk Road.
- During Mongol rule, trade and cultural exchange in Europe and Asia increased.
- Mongol rulers spread Islamic and Chinese culture throughout their kingdoms.

A The Mongols rapidly expanded their territory. Their speed of travel and military skill made them difficult to defeat.

B This illustration shows a Mongol attack on a neighboring kingdom. Mongol battles often ended in destruction and brutal massacres.

0 500 1000 kilometers
0 500 1000 miles
The Mongol Empire stretched from the Pacific Ocean to Eastern Europe and the Middle East. It was the largest land empire in history. Compare it to the size of the United States.

Genghis Khan, which roughly means Universal Ruler, was born with the name Temujin. He united the Mongol tribes, introduced their first law code, and conquered much of Asia.

After 1259 the Mongol Empire was divided into four regional khanates, or kingdoms. Many Mongol rulers adopted the cultures of the regions they had conquered.
Kingdoms of Southeast Asia

Unlike its neighbors India and China, Southeast Asia did not develop large empires. The region was ruled by many small kingdoms.

- Many culture groups lived in Southeast Asia. Their kingdoms were often at war.
- Kingdoms were influenced by Indian and Chinese cultures. Hinduism and Buddhism spread through the region.
- The Khmer kingdom of Angkor developed one of the region’s longest-lasting civilizations.

Angkor Wat, built in the 1100s, is located in the ancient city of Angkor. This religious monument is part of the region’s largest temple complex.

Core areas of major kingdoms emerged by the 800s. Surrounding areas were loosely controlled and often had more than one ruler.

- Buddhist temple complex

600s–1000s Srivijaya dominates regional trade.
Ming Dynasty of China

After almost 100 years of foreign rule in China, the Ming dynasty restored Chinese control. Ming rulers brought political and economic growth to China.

- Ming emperors ended Mongol rule. They rebuilt regions of the empire damaged from years of war.
- To rebuild northern China, Ming rulers moved the capital to Beijing and encouraged people to move back north.
- In the 1600s rebellions and war weakened the Ming dynasty. Northern invaders then conquered China.

Porcelain, also known as china, was invented during the Tang dynasty. This porcelain vase shows the unique Ming style.

Ming China and Trade 1368–1644

Early Ming rulers allowed merchants to trade freely. Later, only the government could legally trade outside China. What were China’s main exports?
From Imperial to Feudal Japan

Unlike mainland Asian civilizations, Japan was rarely threatened by invaders. However, it was influenced by neighboring cultures.

- Japan's religion, written language, and government were based on ideas from China and Korea.
- Strong emperors ruled early Japan. Over time, civil wars divided Japan into tiny kingdoms with their own rulers.
- As internal conflict decreased, a more unified Japan increased trade with neighboring regions.

A Conflicts between land-owning families weakened the emperor's political power. By 1192 shoguns (generals) took over as the true rulers of Japan.

B Kyoto was the imperial, or the emperor's, capital. Strong imperial power made Kyoto one of the world's great cities.
After years of civil war, a new social structure emerged in Japan. Local military leaders, called daimyo, challenged the power of the shoguns with armies of paid samurai. Compare this chart with the chart on page 68.

Samurai
- Low status, although some were wealthy

Ruler in name only
National military leader
Local warlord

Low status, although some were wealthy

Merchants and Artisans

Peasants

Largest and poorest group

Samurai followed a strict honor code called bushido, or "way of the warrior." They valued honesty, courage, and fighting skills.

If they fought with swords, why were they called sho-guns?
Shogun means great general in Japanese. The first shogun, Yoritomo, received his title from the emperor in 1192. Yoritomo established a military government called a shogunate.

In the late 1500s legal and illegal Japanese trade increased in East and Southeast Asia. About ten thousand Japanese lived outside of Japan, some as traders.

Japanese Trade 1550-1641
- Major trade route
- Japanese pirate activity, 1550-1567
- Japanese capital
Early Civilizations of Africa

Many different cultures developed in Africa after Egypt and Kush (see pages 18–19).

- The Bantu people of western Africa spread east and south beginning around 500 B.C. They spread ironworking, farming, and herding across central and southern Africa.
- In the east, Axum became a strong empire. It defeated Kush and controlled trade on the Red Sea.
- Axum kings converted to Christianity, increasing contact between eastern Africa and the Mediterranean region.

Bantu migrations for about 1,500 years. They combined with local culture groups except in areas unsuitable for farming. Today there are more than 300 different Bantu culture groups.

Horses and larger breeds of cattle died of sleeping sickness in central and southern Africa. As a result, Bantu farmers could not use plows. They also needed crops that could survive heat, floods, and drought.

Bantu Innovations

- Iron
  Produced iron tools such as axes, hoes, knives, and spears.

- New Crops
  Introduced plantains, creating a year-round supply of food.

- Pastoralism
  Developed the practice of moving herds to fresh grazing land.
The royal tombs of Axum have large steles, or stone monuments, carved with false doors and windows. This stele is for the tomb of King Ezana, the first Christian king.

Where does it come from?

Both the Axum and Bantu cultures are indigenous to Africa, meaning they originally developed there. Christianity is not indigenous to Africa but was introduced to the continent by travelers.

Axum controlled the ivory and incense trade to India and the Byzantine Empire. Axum fought Persia for control of Yemen and Arabia just before Muhammad was born in Mecca (see page 46).
Islamic Kingdoms of North Africa

Muslims began conquering the Byzantines and Vandals in North Africa in 639 (see page 46). However, Muslim North Africans soon gained independence from the Islamic empires further east.

- Arab migrants and the indigenous Berber people formed new kingdoms. These kingdoms expanded into sub-Saharan Africa, Europe, and southwest Asia.
- North Africa grew as a center of learning. Muslim and Jewish scholars wrote books on mathematics, science, and philosophy (see page 66). These books later influenced Western European thought.
- North Africa also became a major center of trade. North African goods and merchants moved across Europe, Asia, and Africa.

This illustration shows warriors from the Fatimid Caliphate. The Fatimids conquered Egypt and later founded Cairo.

Anger against the greed of Muslim rulers in Spain and Arabia led the Fatimids and Almoravids to power. Their kingdoms faced continuous threats from Christians, other Muslims, and each other.

What do algebra and syrup have in common?
Both words are from Arabic. When Europeans studied Arab science books, they found things they had never heard of. As a result, they incorporated Arabic words including *al-jabr* and *sarah* into their vocabulary.
Kurdish commander Saladin conquered Fatimid Egypt as part of a larger war against Crusaders from Western Europe (see page 71). His dynasty, the Ayyubids, survived until a new crusade invaded Egypt.

**The Travels of Ibn Battuta 1325–1354**
- 1325–1349
- 1349–1354
- MALI Culture region

Ibn Battuta was born in Morocco. He visited nearly every Islamic country and several non-Islamic countries. His book *Rihlah* or *Travels* contains some of the best descriptions of life in the 1300s.
Empires of West Africa

Western African empires developed south of the Sahara, in the Sahel region. These kingdoms became wealthy through trade.

- Ghana first controlled the crucial gold-producing areas and the southern end of the Saharan trade routes.
- After Ghana fell, new Islamic empires grew in the same area. First Mali then Songhai controlled the gold and the southern trade route.
- Trade cities such as Jenne and Timbuktu were centers of West African learning for centuries.

A Western African cities developed along trade routes to the Mediterranean. The city of Jenne, in the modern country of Mali, remains a trading center.

B No one is sure exactly when the Ghana Empire was established. By 700 Ghana was the most powerful kingdom in West Africa. The Almoravids (see page 58) probably weakened or destroyed the empire.
Sundiata Keita founded the Mali Empire around 1230. The Mali Empire spread Islam throughout West Africa. New horse-riding armies were able to move quickly across the Sahel.

Mansa Musa (King Moses) ruled Mali from 1307 to 1332. His wealth became legendary outside of Africa when he set off on his hajj with over 70,000 servants and 12 tons of gold.

Why salt?
Humans and animals need salt, especially in hot climates. People usually make salt by evaporating natural salt water. In West Africa, the humid climate made this difficult. As a result, West Africans traded their gold and ivory for salt mined or evaporated in the Sahara.

Sunni Ali led a revolt against Mali, establishing the Songhai Empire. Even as the empire grew, West African trade was shifting from the Sahara to the Atlantic Ocean.
African States and Trade

Trade strengthened African states and empires as it linked the economies of Africa, Asia, and Europe.

- In East Africa, Islamic and indigenous African cultures mixed to form a new culture called Swahili. Swahili city-states developed along the coast.
- Bantu farming villages grew into many different states throughout central and southern Africa.
- Before 1500 most African trade went across the Sahara or to the Indian Ocean.
- Salt and gold were the most important goods within Africa. Gold and ivory were valuable for trade with the rest of the world.

The Shona of southeastern Africa built Great Zimbabwe as a trade center and capital. This walled area was designed to look like a cattle pen, probably as a sign of the king’s wealth. Locate Great Zimbabwe on map B.

By 1600 many states had emerged in Central and East Africa. These states had diverse cultures, systems of government, economic activities, and religious beliefs.

In 1200 most of the largest cities were in East Asia and Africa. Where in Africa were the continent's largest cities?

Middle East and Europe are dependent on African gold.

Sea trade links Africa with India, Persia, and Arabia.

Interior states and kingdoms compete for control of resources.

Gold, salt, and ivory were the most valuable African trade goods. Salt was widely used for preserving food. Gold was used for coins in Europe and the Middle East. Ivory was prized in eastern Asia for carved works of art.
Early Kingdoms of Medieval Europe

During the Middle Ages or medieval era, many Europeans were poor, uneducated, and violent.

- Early in the Middle Ages, barbarian tribes settled in Western Europe and established their own kingdoms.
- Barbarian kings, wanting to be as civilized as the Romans, became Roman Catholic.
- One Frankish king, Charlemagne, conquered much of Western Europe and launched education reforms.

Compare the barbarian invasions on page 43 with the kingdoms on this map.

Barbarian Kingdoms 418–644

1. 418 Visigoths start the first barbarian kingdom.
2. 432 St. Patrick brings Christianity to Ireland.
3. 461–644 Barbarian kingdoms become Roman Catholic.
5. 534 Byzantine Empire conquers Vandals.
6. Avars force Slavs to migrate.
7. Lombards conquer Ostrogoths and start their own kingdom.
8. Lombards conquer the Anglo-Saxons.

Charlemagne, a Frank, conquered the Bavarians, Lombards, and Avars. He hoped to restore the Roman Empire in the West. Here his army battles the Saxons.
Charlemagne's Frankish Empire
771-814

Expansion Under Charlemagne
- Frankish Empire, 771
- Additions to the Frankish Empire by 814
- Defeated but not taken over
- Battle
- Capital

Charlemagne's empire extended beyond what is now France into lands that are now Germany, Italy, Switzerland, Belgium, and the Netherlands. His empire spread Christianity into new areas.

Who can read?
After the fall of Rome, education in most of Western Europe collapsed. Monks saved and copied books and taught a few students to read. Monasteries remained the center of European learning for almost 1000 years.

*involved reading, rereading, commenting on, and imitating the classics

At that time, lessons were taught in Latin. Charlemagne brought in teachers from England, Ireland, Spain, and Italy. But, without money or enough teachers, Charlemagne's education reform was largely a dream.
**Moorish Spain**

In 711 the Moors, Muslims from northwestern Africa, invaded Spain. Their Islamic kingdoms survived in Spain and Portugal for 800 years.

- The Moors brought learning back to Spain with ancient Greek and new Arab books on science, math, and philosophy.
- Many Moorish kingdoms were tolerant of Christians and Jews.
- Over the centuries, Christians from northern Spain, France, and England fought to push the Moors out of Europe.

**Moorish Conquest**

The Moors quickly fought their way across Spain and Portugal. Christian forces retreated and held out in Asturias.

**A**

This mosque in Cordoba, the Mezquita, was once a Visigoth Christian church. The Moors started rebuilding it in 784, using materials from an old Roman temple on the site. Today the building is used as a Roman Catholic cathedral.

**Science & Technology**

**Islamic Contributions**

**Mathematics**
- Introduced a number system from India, now known as Arabic numerals, to the West
- Invented the decimal point
- Developed fractions
- Developed and applied algebra

**Medicine**
- Invented surgical instruments, including the forceps, syringe, and scalpel
- Wrote leading textbooks on surgery and medicine, used in Europe for 500 years

**Navigation**
- Developed an accurate astrolabe

**Industry**
- Built the first windmill

The Moors improved upon mathematics, medicine, and technology from the East (see pages 44–45). The rest of Western Europe was significantly behind Spain in these areas.
Viking Impact on Europe

Vikings came from Scandinavia—Denmark, Sweden, and Norway. They were fierce warriors and superb sailors.

- Vikings terrorized towns along the coasts and rivers of Europe. They murdered villagers and looted and burned their towns.
- Vikings also built settlements in Europe as well as in Iceland and Greenland.
- Viking sailors reached North America, becoming the first Europeans to see the Americas.

---

Viking ships used sails and oars to cross open water and move up rivers. Vikings landed quickly and left before defenders could gather.

---

Viking Raids and Settlements

Feudalism and the Holy Roman Empire

Although there were kings during the Middle Ages, power was held by local leaders.

- To govern his land and protect it from invaders, each local leader—usually a noble—needed his own soldiers, supplies, and fortified castles. The result was a system known as **feudalism**.
- One leader, Otto I, created a feudal empire later called the Holy Roman Empire. In the empire, local leaders held the real power.
- The Holy Roman Empire survived for over 800 years.

### Social Structure

#### Feudalism in the Middle Ages

Feudalism was based on exchange. Each social class provided a service to another class, in return for land or a service.

**Provided**
- Use of his land
- Law and order
- The services of their knights
- Military service
- A share of their own crops
- Labor on the lord's land
- Rent, taxes

**Received**
- Allegiance
- Knights for army
- Land they divided between knights
- Land they could collect taxes on
- Land to farm
- Protection

**A: King**
- Lords (upper vassals)
- Knights (lower vassals)
- Serfs and Peasants

**B: In 1215 English barons (lords) forced King John to sign the Magna Carta or Great Charter. This document limited the power of the king and is still considered part of the English constitution.**

**C: In much of Europe, lords owned manors like this one. Peasants who were the property of their lords were called serfs. Serfs farmed land both for their lords, who were usually nobles, and for themselves.**
The Holy Roman Empire grew through conquest, marriage, and inheritance. But its emperors did not have firm control over the empire, and each region had its own laws.

**How Big Was the Holy Roman Empire?**

**Holy? Roman? Empire?**
Otto I united northern Europe with the Roman Catholic Church. Later emperors named this territory the Holy Roman Empire. Like Otto, they were violent, German, and did not have much real power.

The Holy Roman Empire included almost all of central Europe. Compare this empire with the original Roman Empire on page 39. Also compare it to the size of the United States.
Crusades to the Holy Land

In 1095 the Byzantine emperor asked the pope for help in defending his empire from Muslim attacks. The pope agreed and called on European Catholics to join in a crusade against the Muslims.

- It was the first of eight crusades in which Europe sent huge armies to drive Muslims from the Holy Land, especially from Jerusalem.
- Thousands of Muslims, Jews, pagans, and Christians died in the brutal fighting.
- The crusades did not win permanent Christian control over the Holy Land. But they had the accidental benefit of increasing trade and knowledge of other cultures.

When the First Crusaders captured Jerusalem, they massacred 40,000 Muslims and Jews.

Disease, hunger, and war along the way killed as many Crusaders as battles with Muslims did. Three of the eight crusades are shown below.

World of the Crusades
1095–1254

- Roman Catholic area
- Orthodox Christian area
- Islamic area
- Crusade
- Crusader victory
- Islamic victory
- Massacre of Jews

Map shows boundaries of 1097.

Over a span of two centuries, Crusaders left for the Holy Land eight times. Which crusade was the longest?

The First Crusaders divided the land they captured in the Middle East into four states. They also built castles to protect these states.

**The Crusader States 1099–1140**
- Roman Catholic area
- Orthodox Christian area
- Islamic area
- Crusader States, 1140

**Islamic Victories 1146–1291**
- Roman Catholic area
- Orthodox Christian area
- Islamic area
- Islamic victory

**Crusade or jihad?**

Christians viewed crusades as armed pilgrimages—wars for a religious cause. Muslims viewed these wars as jihads or armed struggles against enemies of Islam. Both Christians and Muslims believed dying in these wars would get them directly into heaven.

After the eight crusades, who controlled the Middle East—Christians or Muslims? Compare this map with map A.
Trade Routes and Plague

Increased trade spread new goods across Europe. However, it also spread the worst disease in European history—the bubonic plague.

- Northern Europeans traded wool cloth, grain, wine, and silver for silk, perfume, and spices from Asia.
- Goods from Asia passed through the Mediterranean, and so did the bubonic plague. Rats, fleas, and people spread the plague along trade routes.
- In five years the bubonic plague killed a quarter of the people in Europe.

European Trade
1200–1360

Main Trade Routes
- By land and river
- By sea
- City in Hanseatic League
- Other city

Map shows boundaries of 1360.

A As trade increased, European cities grew. To protect their trade routes, a number of northern cities formed an alliance called the Hanseatic League.

B Trade from the eastern Mediterranean made Venice rich. But it also brought the plague. Worsened by overcrowding and poor sanitation, the plague devastated the city.
**How did the plague change Europe?**

The bubonic plague altered European society. After the plague, surviving peasants demanded higher wages and lower taxes. Nobles had to accept their demands because so few workers were left.

**Population**

Europe 800-1500

- 1346 Plague strikes.
- Barbarian invasions end.

- Relatively peaceful times allowed Europe's population to rise—until the plague struck. How many years did it take for the population of Europe to recover?
Reconquest of Spain

For almost 800 years, Christians fought to regain Spain and Portugal.

- Far northern Spain was the only region that remained independent throughout Moorish rule.
- From there, Christian kingdoms gradually fought their way south.
- In 1469 the marriage of Ferdinand of Aragon and Isabella of Castile united most of Spain. They completed the reconquest in 1492.
- These rulers began the Spanish Inquisition in 1480 to imprison, expel, or kill Jews and Muslims left in Spain.

Although this map shows only a few major battles, nearly continuous war slowly pushed the Moors back to North Africa.

**Christian Reconquest 850–1492**

- Christian control, 850
- Christian gains by 1040
- Christian gains by 1150
- Christian gains by 1264
- Islamic control, 1264
- Christian armies
- Christian victory

Map shows boundaries of 1230.

In 1400 most of the largest cities in the world were in Asia. Why do you think only one was in Europe? (Look again at page 73.)
Rise of the Ottoman Empire

The Ottoman Empire began as a small kingdom in the region known as Anatolia, near the Black Sea.

- The Ottomans were Muslim Turks who warred with neighboring Islamic kingdoms and European Christians.
- In the 1300s, the Ottomans organized the Janissaries. These were slaves, prisoners of war, and children trained as professional soldiers.
- Under Sultan Mehmet II, the Ottomans conquered Constantinople.
- After conquering the Byzantine Empire, the Ottomans gained power and wealth by controlling important trade routes.

Who were the Ottomans?
Groups of Turkish nomads migrated from Central Asia to Anatolia. In 1300 one of these groups began to expand its territory and build an empire. Its leader was named Osman, and his followers and successors came to be known as Ottomans.

As the Ottoman Empire grew, its Turkish rulers gained control of trade routes connecting Asia, Africa, and Europe. They charged high taxes on goods that were carried through their territory.
Trade in the Indies

Exotic trade goods from southeast Asia—the Indies—and from East Asia were highly desired by Western Europeans. These goods were extremely expensive.

- Travellers from Europe brought back stories of wealth and technology from the East.
- Travel on the Silk Road became dangerous as the Mongol Empire fell apart (see page 51). People began to look for another route.
- Middlemen in Central Asia and the Mediterranean region marked up the price of goods, making them too expensive for all but the richest people.
- Zheng He, a Chinese captain, lead seven voyages to expand Chinese power and find a replacement trade route for the Silk Road.

Marco Polo travelled the Silk Road and across the Indian Ocean. His stories excited European interest in Asia. This illustration from his Book of Marvels shows him in India with pepper farmers.

Merchants in Central Asia and the Middle East controlled trade between the Indies and Europe (see pages 44–45 and 75). Merchants and rulers in China and Western Europe wanted to bypass them and increase their own profits.

The Riches of the Indies
1400–1500

- Gold
- Silver
- Precious stones
- Ivory
- Porcelain
- Perfume
- Spices
- Cotton
- Silk
- Trade route
The new Ming dynasty in China (see page 53) wanted to demonstrate its power and find sea routes to the west. Using the largest sailing ships ever built, Zheng He commanded 27,000 men on seven voyages.

Spices from the Indies, such as cloves, cinnamon, and pepper, were worth as much as gold to Western Europeans. Kings sponsored explorations to win control of the spice trade.

Voyages of Zheng He
1405–1433

Why stop?
After several of Zheng He's expeditions, many officials felt they cost too much and produced too little. As a result, the ships were left to rot and Zheng's journals were burned.
Age of European Exploration

Beginning in 1420, Europeans began to explore the lands around the Atlantic Ocean. They hoped to find new sources of wealth including a route to the Indies.

- Competing European powers developed new technologies in shipbuilding and navigation that allowed them to explore new routes to the Indies.
- Europeans encountered American, African, and Asian cultures they had never known before.
- Often the European power that first explored an area later returned to conquer it.

New ships such as the carrack were faster and safer than earlier ships. This Japanese screen shows a Portuguese trading carrack. By the 1500s more goods were being moved by sea than by land.

Where are we?

Inventions from Asia allowed Europeans to sail farther than ever before. The compass, from China, showed direction and the astrolabe, from the Middle East, showed latitude. The triangular lenteen sail, also from the Middle East, allowed ships to sail almost straight into the wind.

From 1420 on, Prince Henry of Portugal (in black) sponsored expeditions along the African coast, urging his captains to "go back and go still further." Although he never sailed a ship, he is called "Henry the Navigator."
The map shows the key voyages of discovery that gave Europeans more complete knowledge of geography than ever before. Which countries explored which areas?

**Western European Explorations by Sea, 1490-1522**
- Lands known by Europeans in 1490
- for Portugal
- for Spain
- Trade route

Most of the largest cities in 1600 were still in the Mediterranean, India, and East Asia. Western European cities remained smaller, but trade and colonies increased their wealth.
Aztec Empire

The Aztec migrated from the north to a small island in the Valley of Mexico. They built one of the largest empires of Middle America.

- Religion dominated every part of Aztec life. The Aztec worshipped hundreds of gods and performed many kinds of religious ceremonies.
- The Aztec were fierce warriors. They waged war to expand their empire.
- The Spanish came to Mexico in 1519. They conquered the Aztec Empire in 1521 and destroyed its capital.

**Aztec Empire**

1325–1519

- [ ] By 1440
- [ ] By 1519
- [ ] Aztec capital

The Aztec constantly fought with their neighbors in order to gain more territory and capture more people to sacrifice to their gods.

- **1325** Aztec settle on an island in Lake Texcoco.
- **1431** Three cities, called Triple Alliance, set up Aztec Empire.
- **1521** Spanish conquistador Cortés conquers the Aztec.
- Aztecs are often at war with their neighbors.
- Officials from Tenochtitlan are sent to keep remote areas under Aztec control.

Built on a lake, Tenochtitlan was larger than most cities in Europe. Its palaces, markets, and temple pyramids amazed the Spanish. Hernan Cortés, the commander of the Spanish, said, “It is hardly possible to describe their beauty.”
Inca Empire

Around the same time the Aztec were building their empire, the Inca developed a large empire in South America.

- The Inca built an empire that extended through the Andes Mountains and along the west coast.
- They were excellent architects and engineers and built a vast network of roads and bridges. These helped their strong central government control even the most remote parts of the empire.
- The Spanish came to South America in 1532. They killed the Inca emperor and took over the empire.

Inca Empire
1438–1533

Powerful emperors greatly expanded Inca territory in less than 100 years. By 1525 the empire stretched 2,600 miles.

Use this chart and the one on page 29 to compare and contrast Aztec, Inca, and Maya contributions.

Francisco Pizarro, a Spanish conquistador, captured Atahualpa, the Inca emperor, and held him for ransom. When the ransom was paid, Pizarro had Atahualpa killed anyway. This was drawn by a native Peruvian in 1615.
Europeans Explore and Settle the Americas

Early European explorers searching for the Indies found unexpected opportunities in the Americas. By 1750 Europeans controlled most of the Americas.

- Europeans established colonies in the Americas and looked for ways to make a profit from the land and its resources.
- European colonization led to the conquest of Native American peoples, including the Aztec and Inca Empires.
- As European land claims expanded, Native Americans lost control of their traditional lands.

What about Australia?

Australia wasn’t settled by Europeans until the late 1700s. At the time, transportation (deportation) was a common punishment for crimes. Between 1787 and 1868, about 162,000 convicts were shipped from Great Britain to Australia.

Exploration of the Americas led to the establishment of European land claims and settlement regions. By 1640 which European country had the largest settlement regions?
Caribbean plantation owners used African slaves to plant and harvest sugar cane, extract its juices, and boil it into sugar. Life for these slaves was especially brutal. They rarely survived more than seven years on a sugar plantation.

European powers claim most traditional Native American lands.

Europeans settle or mine part of the land they claim but they do not use most of it.

Native Americans stay on their lands as long as possible despite foreign claims.

Europeans in Middle and South America made money through activities such as sugar production and silver mining. An estimated one third of Europe's economy came from sugar.
Europe During the Renaissance

Near the end of the Middle Ages, the Renaissance, a "rebirth" of European learning and art, transformed Western Europe.

- The Renaissance began in Italy. Scholars there rediscovered Greek and Roman art, science, and philosophy.
- The great works of the past inspired new artistic styles.
- Wealthy Italian city-states gave money to support new works of art based on Renaissance ideas.

 predefined image

The Renaissance Spreads Across Europe
1350–1600

- Flow of Renaissance ideas
- Home of Renaissance artist

Map shows boundaries of 1470.

A

- Plays by William Shakespeare are still performed around the world today. Other Renaissance playwrights included Marlowe, Moliere, and Vega.

B

- Johannes Gutenberg invented uniform movable metal type. His improvements to the printing press made books and pamphlets less expensive and helped ideas spread.

C

- Miguel de Cervantes’ Don Quixote was the first western novel. It was written in the vernacular, or language of the people, not in Latin, and in prose, not poetry. Other Renaissance novelists included More and Rabelais.
1618–1648
Thirty Years' War is fought by religious rivals.

1683
Ottomans defeated at Vienna.

1784
Russia starts building trading forts in North America.

1605
Cervantes publishes Don Quixote.

1650
Dutch control most European trade in Asia.

1762
Rousseau publishes The Social Contract.

1770
Colonial powers control most of the Americas.

---

D
Balance, harmony, and perspective were key elements of Renaissance paintings. Compare Leonardo da Vinci's Mona Lisa with the medieval painting on page 70. Other Renaissance painters included Raphael, Van Eyck, Durer, and Brueghel.

E
Renaissance architects admired the symmetry, proportion, columns, domes, and round arches of buildings from ancient Greece and Rome. This dome was designed by Filippo Brunelleschi. Other Renaissance architects included Palladio and Alberti.

F
Renaissance sculptors were influenced by the realistic works of ancient Greece and Rome. Compare Michelangelo's La Pieta here with the Greek carvings on pages 33–34. Other Renaissance sculptors included Donatello, Cellini, and Verrocchio.
During the Reformation, Western Christianity split into two groups: Roman Catholics and Protestants.

- In 1517 Martin Luther, a Catholic monk, began the Reformation, a movement to reform the Roman Catholic Church.
- Luther disapproved of the Church’s practice of indulgences, the pardoning of sins for money. This and other criticisms led to the creation of separate Protestant churches.
- Conflicts between Catholics and Protestants caused wars throughout Europe.

**Why are they called Protestants?**

Protestants got their name from protesting, or speaking out against, the authority of the Catholic Church. Protestantism is the name for most non-Catholic and non-Orthodox Christian churches.

**Reformation Europe**

- **Predominant Religion, 1550**
  - Orange: Roman Catholic
  - Red: Protestant
  - Green: Anglican
  - Light Blue: Calvinist
  - Light Yellow: Eastern Orthodox
  - Dark Yellow: Mix of Christians

**Notes**

- Luther, shown preaching here, thought sermons should be given in the congregation's native language, rather than Latin. He also wrote and translated hymns and the Christian Bible into his native language, German.

**History Events**

1. 1517 Luther protests church corruption, begins Reformation.
2. 1534 Henry VIII breaks with pope to found Anglican Church.
3. 1536 John Calvin starts new branch of Protestantism.
4. 1542 Roman Inquisition is created to fight Protestantism.

**Question**

Lutheran, Calvinist, Anglican, and other Protestant churches rapidly gained followers. Which regions had become mostly Protestant by 1560?
Catholic efforts to stop the spread of Protestantism became known as the Counter Reformation. Religious conflicts and land disputes erupted into the Thirty Years’ War.

D Catholic leaders made it a crime to print or read Protestant books. Forbidden books were burned in public.

**CULTURE**

*1654 Christianity splits into two churches: Eastern Orthodox and Roman Catholic.

The major Christian churches survived the Reformation and Counter Reformation. They still exist today, either with the same names or as the foundations of more recent churches.
Growth of Eastern Empires

In the 1600s the Ottoman Empire was the world’s strongest and wealthiest empire. Around that same time Russia was growing into the world’s largest country.

- Under Ottoman rule, Islam spread into Eastern Europe. However, the Ottomans allowed their non-Muslim subjects to practice other religions.
- In 1547 Ivan the Terrible became the first czar of Russia. The czars would remain in power until 1917.
- Under the rule of Peter the Great and then Catherine the Great, Russia grew in power and adopted many customs of Western Europe.

The Suleiman Mosque was built to honor the great Ottoman ruler Suleiman the Magnificent. Today it is one of the largest mosques in Istanbul, the Turkish name for Constantinople.

The Ottoman Empire continued to expand for over 200 years. Compare this map with map E on page 75. What new areas were conquered after 1481?
Once a country of modest size, Russia grew into the world’s largest country. The greatest expansion took place under Peter the Great, whose reign ended in 1725.

In the Ottoman Empire and Russia, many sultans and czars were absolute monarchs. Over generations, many absolute monarchies became limited monarchies.

Catherine the Great was not Russian, yet she ruled Russia for over 30 years. During her reign she promoted religious tolerance, improved medical care, and promoted the arts.
As Europeans formed colonies overseas, most of the world became linked through trade.

- Based on the voyages of early explorers, Europeans claimed land in Asia, Africa, and the Americas.
- These regions were sources of valuable trade goods. European countries competed for access to these goods.
- As European trade expanded, more and more goods were exchanged among different regions of the world. A world economy began to form.

**Economics**

**Mercantilism and Free Trade**

<table>
<thead>
<tr>
<th>Mercantilism</th>

Most of the largest cities in 1800 were trade centers. As the global trade network grew, the world became more interconnected.

Europeans traded in goods, such as coffee and silk, as well as in slaves. Usually European trading powers controlled the ports near the sources of trade.
Scientific Revolution and Enlightenment

The 17th and 18th centuries have been called the **Age of Reason**. People began to question religion, science, and government.

- Scientists developed the scientific method, testing old ideas against new observations made with more precise instruments.
- The resulting **Scientific Revolution** completely changed how people saw the world.
- Philosophers and governments hoped to replace older ideas of government and society with new ones that worked better. This movement was called the **Enlightenment**.
- Enlightenment philosophers concluded that society was a voluntary group of free and equal people. This encouraged people to fight for freedom and equality.

**SCIENCE & TECHNOLOGY**

**Scientific Revolution, 1543–1800**

- 1543: Nicolaus Copernicus (Polish) publishes theory that 7 planets revolve around the sun.
- 1509: Johannes Kepler (German) finds planets follow an elliptical orbit around the sun.
- 1574: Anton van Leeuwenhoek (Dutch) improves the microscope and observes bacteria.
- 1610: Galileo Galilei (Italian) discovers Jupiter’s moons with his telescope.
- 1662: Robert Boyle (Irish) discovers a relationship between pressure and volume of a gas.
- 1665: Robert Hooke (English) studies plants under a microscope and discovers cells.
- 1667: Isaac Newton (English) publishes theory of gravity explaining why planets stay in orbit.
- 1772-1774: Antoine Lavoisier (French) proves that matter cannot be created or destroyed—it only changes in form.
- 1774: Joseph Priestley (English) and Carl Scheele (Swedish) isolate oxygen.
- 1781: William Herschel (English) discovers the planet Uranus.
- 1782: James Watt (Scottish) invents a new steam engine.
- 1753: Carl von Linne (Swedish) establishes a method for naming and classifying plants.

Some of these scientists, particularly Copernicus and Galileo, were denounced by religious authorities. Their discoveries contradicted the Bible.
1. A multitude of laws often only hampers justice.
   —René Descartes
   *Discourse on Method*, 1637

2. Sovereign power is conferred by the consent of the people.
   —Thomas Hobbes
   *Leviathan*, 1651

3. [People] unite, for the mutual preservation of their lives, liberties and...property.
   —John Locke
   *Two Treatises of Government*, 1689

4. It is necessary...that power should be a check to power.
   —Charles de Secondat
   Baron de Montesquieu
   *The Spirit of the Laws*, 1748

5. All men are by nature free.
   —Voltaire
   *Candide*, 1759

6. The people, being subject to the laws, ought to be their author.
   —Jean-Jacques Rousseau
   *The Social Contract*, 1762

---

**Enlightenment 1648–1776**

- **1688** The Glorious Revolution limits the power of the monarchy.
- **1648** The newly independent Netherlands has no king and allows all religions.
- **1740** "Enlightened despots" introduce uniform laws.

Pamphlets, books, and letters from Enlightenment thinkers encouraged political change. Look at pages 96–98 to see the impact these ideas had.
**Independence in the Americas**

Most colonies in the Americas—British, French, Spanish, and Portuguese—won their independence over a period of just 50 years.

- Colonists throughout the Americas resented European rule. They could not govern themselves. Their businesses were hurt by taxes and trade limits. Their protests were ignored by European governments.

- In 1776 colonists in 13 British colonies rebelled. Their struggle encouraged colonists in other parts of the Americas to fight for independence.

**How does a revolution turn things around?**

When King George III of England took away some of his colonists' rights, they declared a revolution (a circular movement) to get them back. The result was American independence. Now a "revolution" means an extraordinary change.
Simón Bolívar, the "George Washington of South America," fought the Spanish for six years. He succeeded in gaining independence for South American countries, but his plan for a United States of South America failed.
French Revolution

French kings had complete power. By 1789, however, France was bankrupt and the French people wanted a new government.

- The people of Paris revolted and formed a new revolutionary government that took power away from the king.
- The new government promised freedom and equality to all people in France. By 1791 France was a republic.
- King Louis XVI plotted to overthrow the new government. Instead, the government overthrew the king, tried him for treason, and had him beheaded.

**Social Structure**

**Three Estates, 1789**

Each social class, called an estate, had one vote in the legislature, the Estates General. The king was not part of any estate.

The people of Paris were determined to protect their new government. Mobs seized weapons to prevent royal troops from arresting the revolutionaries.

The French Revolution began with the capture of the Bastille, a prison in Paris. Four years later the revolutionary government executed its enemies, including the king, queen, and nobles. This violent time is known as the "Reign of Terror."

**French Revolution 1789–1794**

- Urban uprising
- Reign of Terror execution, 1793–1794
- Foreign invasion

Map shows boundaries of 1789.
Empire of Napoleon

Napoleon Bonaparte was a young, popular, and very successful general during the French Revolution.

- In 1799 Napoleon seized power from the French government. Five years later, he crowned himself emperor.
- Napoleon expanded the French Empire with conquests across Europe. He placed his relatives and friends on thrones in Italy, Spain, Holland, Germany, and Poland.
- After terrible losses in Russia and again at Waterloo, Napoleon's enemies removed him from power and sent him into exile.

D Napoleon invaded Russia with 600,000 men. They reached Moscow, but winter forced them to retreat. Disease, cold, hunger, and Russian attacks nearly destroyed Napoleon's army.

E Napoleon defeated most of the major nations of Europe, forcing them to become his allies. Only Britain and Russia were able to resist him. Compare the size of France in 1799 when Napoleon took power with the areas under French control by 1812.
Industrial Revolution Changes Europe

The Industrial Revolution changed the way goods were produced, which changed the way people lived and worked. These changes are known as **industrialization**.

- Machines were developed to produce goods faster and in greater quantities. Coal powered these machines.
- Factories were built near coal deposits. Cities near the new industrial areas grew larger and larger.
- The Industrial Revolution began in Great Britain. But industrialization quickly spread to other parts of Europe and to North America.

**How did industrialization affect people’s lives?**
The use of machines to manufacture goods changed where people worked, in factories rather than at home. It also changed where they lived, in cities rather than on farms.

---

**Industry in Great Britain**

**1850**

- Coal mining
- Iron factories
- Textile factories
- City with over 100,000 people

As Britain became industrialized, cities grew larger. Compare map B with map A. How many more cities with over 100,000 people were there in Britain (now the United Kingdom) by 1850?
The Industrial Revolution began in Great Britain, but it soon spread throughout the world. This political cartoon from the United States shows heads of industry benefiting from their workers, while offering little in return.

The quality of workers' lives improved in some ways during the Industrial Revolution, even though industrial jobs were often menial and dangerous.

The Industrial Revolution spread more quickly in some countries than in others. Industrial development depended on having enough natural resources, government support, and money for new factories and technologies.

Industrialization spans from the northwest to the north, south, and east. Mediterranean countries industrialize more slowly.
Nationalism Sweeps Europe

After the fall of Napoleon, kings tried to return Europe to its condition before the French Revolution.

- In 1815 many kings and princes of Europe met at the Congress of Vienna. They returned power to kings who had been removed by Napoleon.
- In 1848 uprisings erupted across Europe. Many people were unhappy with their rulers and governments.
- By 1878 the map of Europe had changed again. New countries and boundaries were created.

Whose country is this?
The Austrian Empire ruled Hungarians, Italians, Czechs, and others. Supporters of nationalism argued that their own groups should have their own countries with democratic constitutions.

At the Congress of Vienna, the boundaries of Europe were redrawn. Compare this map with the map on page 99. Notice that Prussia and the Austrian Empire grew in size.

Revolution swept Europe in 1848. German workers, such as those pictured here in Berlin, fought for social reform, democracy, and nationalism.

---

- **1861** Most Italian states unite to form Italy.
- **1867** Austrian Empire splits into Austrian and Hungarian kingdoms sharing one ruler.
- **1871** France loses two eastern provinces to German Empire.

In some places nationalism united countries, while in other places it divided them. Compare this map with map A. Where did the revolutions in the timeline lead to new nations?
Imperialism in Asia and the Pacific

For centuries European imperialists had claimed land in Asia and the Pacific for the purpose of controlling trade.

- Asian products such as tea, porcelain, and silk were very popular and valuable in Europe and the Americas.
- Most of Japan’s and China’s ports, however, were closed to European ships and goods. By 1860 American and British troops had forced them to open.
- Rebel lords overthrew Japan’s ruling shogun for not protecting the country from foreigners.

Commodore Matthew Perry of the United States (center) threatened to attack Edo, the capital of Japan, unless government officials agreed to meet with him. Perry forced them to sign a treaty opening Japan to trade with the United States.

European countries controlled vast territories from northern Asia to the South Pacific. Which countries in eastern Asia were not under European control?

**European and American Territories by 1870**

- British
- Dutch
- French
- Portuguese
- Russian
- Spanish
- United States
British attacks and U.S. threats forced China and Japan to sign treaties that gave control of Chinese and Japanese port cities to Europeans and Americans.

**China and Japan Opened to Trade 1839–1860**

1. Before 1853 only one European ship was allowed to dock each year.
2. 1839 British smuggle opium into country. Chinese seize the illegal drug.
3. 1839–1842 British attack Chinese ports in Opium War.
4. 1853 Perry’s fleet opens the way to U.S.-Japanese trade.

The shogun (see page 55) angered many Japanese by signing unfavorable new treaties. Rebel lords (daimyos) secretly trained an army and overthrew him. The lords then restored the emperor to power and worked to eliminate the new treaties.

**Emperor Overthrows Shogun Rulers 1660–1668**

1. Rebel lords are angry about open ports and treaties with foreigners.
2. 1866 Rebel lords form alliance against the shogun.
3. 1867 Rebels overthrow shogun and restore the emperor.
4. 1868 Emperor makes Edo his new capital, renames it Tokyo.
Imperialism Continues in Asia

As European countries and the United States expanded their empires in Asia and the Pacific, Asian resistance increased.

- In European and American territories, Asians rebelled against imperialist control without success.
- The Chinese royal family tried to protect ancient traditions. They supported an uprising, the Boxer Rebellion, to force foreigners out. The revolt failed.
- Japan’s emperor decided his country needed to change. Japan developed a western army and an economy. Soon Japan, too, became powerful and imperialistic, and it quickly won two wars.

Many Chinese resented foreign interference. One group called "Boxers" killed thousands of foreigners, including the German ambassador.

Asians fought to protect their lands from foreign rule. Indian soldiers hired by the British, called "Sepoys," rebelled against British rule in 1857. The Sepoys were defeated.

Resisting Imperialism 1857–1901

Territories and Colonies
- British
- Dutch
- French
- German
- Portuguese
- Russian
- United States
- Rebellion

In 1900, the largest cities were in countries that had experienced an industrial revolution (see pages 100–101). Where were most of these countries located? Which Asian country had an industrial revolution?
Imperialism in Africa

After the slave trade was abolished, Europeans looked for new sources of wealth in Africa. In less than 50 years, Europeans took over almost all of Africa.

- European countries claimed land in Africa to make a profit from resources, expand territory, and gain power.
- The European competition to claim African land became known as "The Scramble for Africa."
- Africans often tried resisting European imperialism, but only two African states remained independent.

Until the late 1800s, there were many independent African states and most European colonies in Africa were along the coast. Compare this map with map E.
Rifles and cannon were faster and deadlier than the weapons of Africans. Despite a remarkable early victory, the Zulus, above, were conquered by the British in six months.

Revolutionary France organized huge conscripted armies, leading to very high casualties. By contrast small, professional armies fought colonial wars with fewer losses.

European leaders met in 1884 to peacefully divide claims on African lands. Africans had no say in the agreement. By 1914 European colonies had been set up in nearly every part of Africa.
World War I Changes Europe

In 1914 an Austrian archduke was assassinated by a Serbian nationalist. Austria-Hungary declared war on Serbia, and military alliances soon brought most of Europe into the conflict.

- The war was fought between the Central Powers and the Allies. The main Central Powers were Germany, Austria-Hungary, and the Ottoman Empire. The Allies included the United Kingdom, France, Russia, Serbia, and later the United States.
- New technology, especially machine guns and chemical weapons, made World War I deadlier than previous wars.
- New countries were formed out of the defeated empires.

Where was the front?
A front is the long battle zone that forms where two armies meet. The bloodiest fighting in World War I took place on the Western Front. There both sides fought from elaborate defensive trenches.

Fighting along the Western Front, the most important battleground, was deadlocked. For over three years, the defensive strength of the trenches prevented the armies on both sides from gaining ground.
Both sides used poison gases that burned eyes, skin, and lungs, and killed thousands of troops. After the war, most countries agreed to ban chemical warfare.

Soldiers often lived for months in muddy, rat-infested trenches. Artillery, poison gas, and disease killed tens of thousands. Behind the front-line trenches shown here was a vast network of trenches that provided supplies and re-enforcements.

After the war, boundaries were changed and new countries were carved from the defeated Central Powers—and also from Russia, which had been one of the Allies. Compare the countries on this map with the countries on map A.
Rise of Dictatorships

World War I left many Europeans poor and jobless. Money was often worthless. People were unhappy and looking for new leadership.

- In 1917 angry Russian soldiers, workers, and peasants overthrew the czar. Civil war followed.
- Communists won the war. Lenin took control and changed Russia into the Soviet Union.
- In the 1920s and 1930s, over a dozen other dictators won control of countries throughout Europe.
- Using brute force, dictators such as Mussolini, Stalin, and Hitler eliminated opposition within their countries.

The Bolsheviks (communists) also were called Reds. Their opponents, the anti-Bolsheviks, were called Whites. Reds and Whites battled for control of Russia.

February Revolution
Uprising forces czar to give up throne in 1917.

October Revolution
Led by Lenin, Bolsheviks establish a communist government.

1918 Bolsheviks pull Russia out of World War I.

1918 Civil war erupts between Reds and Whites.

1919–1921 Red Army advances and wins war.

1922 Communists form the Soviet Union.

Lenin was the leader of the Bolshevik (or Communist) Party. His army and secret police crushed all opponents in Russia. This poster of him announces, "Lenin lived, Lenin lives, Lenin will live forever."
Under communist and fascist dictators, freedom was restricted, social and economic rules were brutally enforced, and minorities were often persecuted.

### The Rise of European Dictators 1917-1939

D. Communist and fascist governments relied on secret police to control their citizens. Radio stations and newspapers, run or controlled by the government, presented only communist or fascist views.

E. In 1937 Mussolini (with his arm raised) and Hitler reviewed German troops in Munich. The visit convinced the two powerful fascist leaders to form an alliance.
World War II Engulfs the World

World War II was the most devastating war in history. It was fought between two groups of countries—the Axis and the Allies.

- Before the war, the Axis nations extended their territories by seizing nearby countries. Japan went into China, Italy into Albania, and Germany into Austria. Other nations joined forces as the Allies and tried to stop them.
- Early in the war, the Axis powers defeated every country they attacked. By 1940 only the United Kingdom was left to oppose Germany in Western Europe.
- In 1941 Germany attacked the Soviet Union, and Japan attacked the United States, causing these two powerful nations to join the Allies.
- By the time the Allies had defeated the Axis, Japan and much of Europe were in ruins.

**WARFARE**

## Axis vs. Allies

<table>

<td>Japan</td>
<td>United States</td>
</tr>
<tr>
<td>Italy</td>
<td>Soviet Union</td>
</tr>
</tbody>
</table>

Six other nations were allies of the Axis during the war.

There were 50 Allied nations from around the world.

**The Allies had greater resources than the Axis.** The United Kingdom used troops and supplies from its colonies. The United States had vast industrial power.

Unlike the Allies, the Axis was prepared for war and had conquered huge areas by 1942. But the Allies recovered and attacked by land, sea, and air.

**What was the “final solution”?**

The Nazis considered Jews and Gypsies (Roma) inferior and evil: a "problem" to be solved. Their so-called "final solution" was to kill them. Six million Jews and two million Gypsies died in the genocide known as the Holocaust.
Aircraft kept evolving throughout World War II. Planes were developed to fly faster and farther. Late in the war, jets were introduced. Here an American Avenger bombs a Japanese airstrip in the Pacific in 1944.

Worldwide, World War II took the lives of more people, mostly civilians, than any other war.
The Cold War Threatens the World

After World War II, the communist and anti-communist nations of the world opposed each other in what came to be called the Cold War.

- The two main opponents were the Soviet Union and the United States, the superpowers that had been allies in World War II.
- The Cold War was mainly a political and economic struggle, but sometimes it erupted into regional shooting wars.
- The Cold War ended when the Soviet Union broke up in 1991.

A After World War II, Berlin was divided into sectors. In 1961 it was divided even further. Soviets built a wall to prevent East Germans from escaping to democratic West Berlin. The wall stood until 1989.

B The United States and the Soviet Union had most of the world's nuclear weapons. Both countries often tested new bombs above ground until they agreed to ban such tests in 1963.

C Iron Curtain was the name symbolizing the military, economic, and political barriers between communist Eastern Europe and democratic Western Europe.

Europe Divided 1946–1991

- NATO member
- Warsaw Pact member
- Other communist country
- Neutral country
- Iron Curtain
- Soviet invasion
Map shows boundaries of 1989.
The U.S.-led NATO alliance and the Soviet-led Warsaw Pact had enough nuclear weapons to kill every person on earth. Neither side could attack the other without risking complete destruction from a counterattack.

**No more nukes?**

Nuclear non-proliferation means not allowing the spread of nuclear weapons or the technology to create them. Since 1968 about 90 countries have signed the Nuclear Non-Proliferation Treaty. It has helped limit the spread of nuclear weapons.

**The Cold War Turns Hot**

The superpowers competed to control key areas of the world. Sometimes U.S. or Soviet troops fought in regional wars, such as Vietnam and Afghanistan, or supplied weapons to opposing sides, as in Angola.
Communist Conflicts in Asia

Communists and anti-communists within countries also opposed each other. In no part of the world was this more common than in Asia.

- When the Chinese emperor lost power, China collapsed into chaos and civil war. After World War II, internal fighting resumed. Communists gained control in 1949.
- The following year, tensions between communist North Korea and anti-communist South Korea escalated into war.
- War between communist North Vietnam and anti-communist South Vietnam dragged on from 1957 to 1975.
- Today China, North Korea, and Vietnam are still communist.

**War without end?**
A peace treaty was never signed ending the Korean War. Years later North Korea is still communist, anti-communist U.S. troops are still in South Korea, and tensions still exist. For example, in 2010, North Korea sank a South Korean warship.

**Chinese Civil War 1945-1951**

- **1945-1946** Soviet Union occupies Manchuria.
- **1949** Communists rename their country “People’s Republic of China”.
- **1949** KMT flee, move capital to Taiwan.
- **1951** Tibet loses its independence.

After World War II, communists forced nationalists onto the island of Taiwan. Compare the areas under communist control by 1946 and by 1950.
After World War II, Korea was divided. In 1950 the communist north invaded the south. U.S., UN, and Chinese troops rushed in to help. Compare the boundaries before and after three brutal years of fighting.

**Korean War**

*1950–1953*

- China enters war, forcing UN troops to retreat.

**Battle Casualties**

- The Somme: July 1, 1916
- D-Day: June 6, 1944
- Ch’ongch’on River: Nov. 25–Dec. 2, 1950 (daily average)

When Vietnam gained its independence, it divided into North and South Vietnam. U.S. troops fought for 15 long years to keep the communist north from taking over the south.

**Vietnam War**

*1957–1975*

- High casualties at the Battle of the Somme were largely due to new technology facing old fighting strategies. As military tactics adapted to the new technologies, casualties dropped.
Independence Sweeps the World

After World War II, European colonies in Africa, Asia, and the Caribbean began seeking independence. Most succeeded within the next 35 years. In the 1990s, after the fall of communism, a second wave of independence swept Asia and Europe.

- The war weakened the economies of the European colonial powers. They could no longer afford to run their overseas empires.
- The colonies felt they could manage their own resources to improve the lives of their citizens. But independence brought unexpected problems, including poverty and civil war.

Mohandas Gandhi led the independence movement in India. In 1930 he led the Salt March to protest a British tax on salt. This march was an act of nonviolent civil disobedience.

Different regions gained independence at different times. It was common for many countries in the same region to gain independence within a few years of each other. Which regions gained independence in which decades?
The United Nations encouraged decolonization. After World War II, the United Kingdom, France, Germany, Spain, Portugal, and the United States began granting independence to their colonies in Africa, Asia, and the Caribbean.

1945
- Self governing: 66.7%
- Under foreign rule: 33.3%

Today
- 99.9% Self governing
- 0.1% Under foreign rule

Eritreans celebrate their independence from Ethiopia after 30 years of war.

**Independence Since 1945**

- Date of Independence
  - Since 1990
  - 1980–1989
  - 1970–1979
  - 1960–1969
  - 1945–1959
  - Before 1945
  - Not independent
Conflicts in the Middle East

Since the fall of the Ottoman Empire in 1918, the Middle East has seen almost continuous conflict.

- In 1948 the United Nations divided Palestine into Arab and Jewish sectors. The Jews called their sector Israel. Palestinians resented giving up their land.
- Israel has been the site of at least four wars and numerous uprisings and terrorist attacks since its creation.
- In 1990 Iraq sought to control the oil-rich Persian Gulf. First it attacked and conquered Kuwait. A United Nations coalition forced Iraq out of Kuwait.
- Islamic fundamentalist movements seeking to enact religious law have been growing in the Middle East and Islamic countries around the world.

A
In 1948–1949 more than 700,000 Palestinians fled Israel and set up refugee camps in neighboring countries. Many Palestinians have lived in refugee camps their entire lives. This camp in Lebanon was rebuilt after heavy fighting.

B
1948–1949 Arabs attack the day after Israel becomes a country. The Arab loss creates many Arab refugees.

2 1967 Six-Day War Israel attacks when Egypt threatens to invade. Israel occupies new territories.

B Neighboring countries refused to accept Israel. Israel defeated each Arab attack and gained more land.

C

2 1979, 1993 Israel returns land to Arabs in exchange for peace.

C Israel has gradually returned most of the land gained in the Six-Day War to Egypt and the Palestinians. However, no agreement has been reached on final boundaries.
D Iraq invaded Kuwait in 1990 in an attempt to control the tiny country's oil fields. The United Nations responded with an intense five-week-long air and ground assault.

E Ayatollah Khomeini (in the large mural) overthrew the Shah (king) of Iran in 1979 and became the first Islamic fundamentalist ruler. He put a series of Islamic laws into effect, including forbidding Western music and requiring women to wear a veil.

Middle of what?

In the 1800s European geographers used Near East, Middle East, and Far East to describe regions east of Western Europe. The Middle East is the region around the eastern Mediterranean Sea and the Persian Gulf.
Recent International Challenges

Today the world faces serious challenges, many of which can only be solved through global cooperation.

- Even after the Cold War, many regions are trapped in violence and war.
- Terrorists use violence against innocent people in hopes of forcing governments to change and eliminating foreign influence in their homelands.
- At the same time, nations are coming together to improve trade, health, nutrition, the environment, and international safety.

A. Global warming has been attributed to an increase in greenhouse gases, such as carbon dioxide. If the trend continues, much of the polar ice caps will melt, significantly raising sea levels.

B. This graph measures Gross Domestic Product (GDP), the value of the goods and services produced in a country in a year. The United Kingdom, Russia, France, Brazil, and Italy also have large economies.

C. Urban populations in many countries have skyrocketed in the last 50 years. Compare this map and chart with the Top 10 Cities in 1900 on page 107. How many cities are still on the list?

</tbody>
</table>
agriculture Practice of raising plants and animals for food and other products. Farming.
Arab Ethnic and culture group that originated in the Middle East and has spread to North Africa.
aristocracy Small ruling class that inherits its powers; may control the land and military in its country. Also called nobility.
astrolabe Device that calculates latitude based on the sun and stars. Important for navigation at sea.
Bantu Large family of ethnic and language groups that extends from West Africa to South Africa.
barbarian A word used by one group to describe another group thought to be less advanced. Often refers to people who invaded the Roman Empire.
bourgeoisie Social class based on money and education. Middle-class professionals and business owners and their families.
bronze Mixture of copper and tin; main metal used for tools and weapons in Europe and Asia until iron replaced it.
Buddhism Religion from India that includes the belief that happiness is found by eliminating all desires. Founded by Siddhartha Gautama, who was known as Buddha or the "Enlightened One."
caliphate Islamic country where the ruler is considered the political successor of Muhammad. Caliphs existed between 632 and 1250.
capital City where a country's government is located.
caravan Group of overland traders and the animals carrying their goods.
casualties People killed, wounded, missing, or taken prisoner in a battle or war.
Christianity Religion that arose in Israel during Roman times and includes belief in Jesus Christ as the Son of God.
church 1. Organization of Christians with shared beliefs, such as the Roman Catholic Church or the Lutheran Church. 2. Group of Christians who worship together. 3. Building where they worship.
citizen Person allowed to vote and participate in government in a democracy.
city Very large settlement of people. Unlike some of those in villages, people in cities do not farm.
city-state Independent city and its surrounding farms. Has its own rulers and is not part of any other country.
civil disobedience Acts to promote political change by peacefully disobeying unjust laws. First used on a large scale by Gandhi in British India after World War I.
civil war War between different groups or regions within a country, usually for control of the country.
civilization Society that has writing, cities, agriculture, artisans, and public monuments.
clergy People whose work directly serves a religion especially Christianity. Includes cardinals, bishops, priests, nuns, monks, ministers, and pastors.
Cold War Armed rivalry from 1946 to 1991 between the United States and its allies and the Soviet Union and its allies.
